

Magnetic Quick Change System

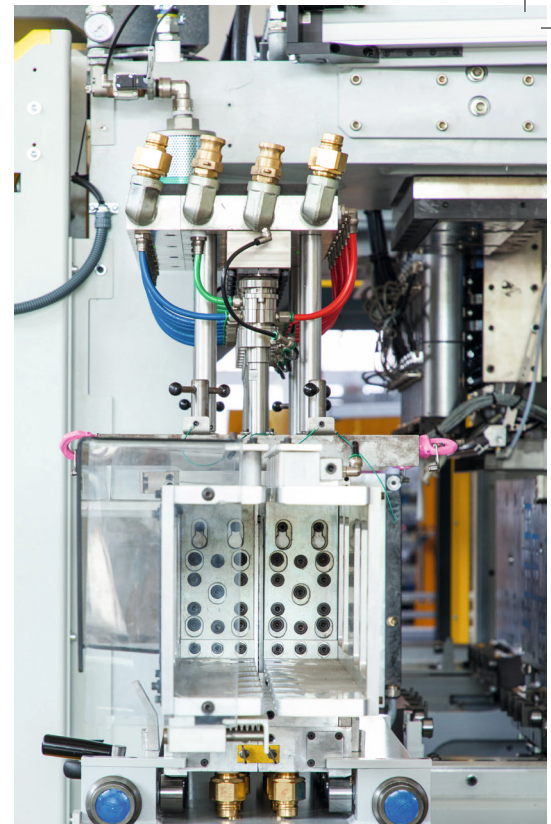

For Mould and Blow Pins
in 15 minutes per Clamping
Unit without any need for
Blow Pin Adjustment

Removal out of
Machine Front

Easy Adaption of existing
Blow Moulds

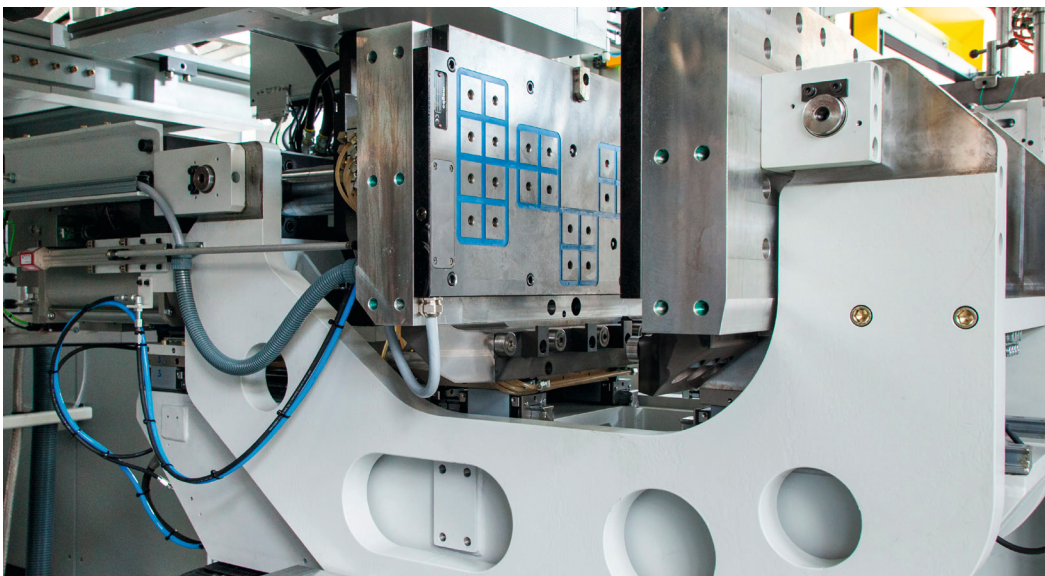

Magnetic Quick Change System

For frequent article changes in production, magnetic mounting technology allows a fast and safe change of blow moulds and pins without the need for any additional alignment.

Centered blowing station on the blow mould with take-out device

- Exclusively available from Bekum magnetic quick-change system for mould and blow pins
- Mould and blow pins change in 15 minutes per clamping unit – without tools
- No additional centering required
- Mould removal by means of an integrated roller table
- Requires only limited space, thus machines in production can stand closer together
- Assembly and removal of moulds takes place via the front of the machine
- Removal of the mould can be carried out by forklift or crane and a special mould cart is not required
- No expensive coupling plates on the mould sets required
- Existing moulds can usually be integrated simply and cost-effectively into the system
- Electrical energy for the clamping system is required only during activation of magnetization and demagnetization
- The clamping function is guaranteed in the event of a power failure

Magnetic mounting plates in the patented C-frame clamping unit
